

COUNTRY LEVEL BASELINE SCREENING ON ACTIONS FOR SUSTAINABLE NITROGEN MANAGEMENT

– based on UNEA-5 Resolution EA.5/Res.2

Country:

	Relevant policy provision /scientific/ technological interventions	Yes/No	Details (If, yes, please provide details)
National policy provisions on prevention and reduction of nitrogen waste			
1.	Does the country have <u>targets on addressing nitrogen losses</u> (e.g., on NOx, nitrates, ammonia emissions etc.)?		
2.	Does the country have a <u>monitoring system</u> for measuring nitrates from wastewater, surface, underground and coastal water bodies, and the marine environment?		
3.	Does the country have <u>measures in place to promote sustainable use of nitrogen</u> ?		
4.	Does the country have any Action plan / Guideline / Code of good practices (on

National policy provisions on prevention and reduction of nitrogen waste			
	voluntary or mandatory basis) on prevention and reduction of <u>nitrates</u> waste from agricultural and other land-based sources?		
5.	Does the country have <u>any legislation for promoting sustainable use of chemical and organic fertilizers</u> ? (e.g., prohibition periods, maximum limits, conditions to be stored and applied etc.)		
6.	Does the country have any <u>Guideline / Code of good practices</u> (on voluntary or mandatory basis) on prevention and reduction of <u>ammonia</u> emissions from agricultural and other land-based sources?		
7.	Does the country have <u>norms on waste water discharges</u> ? (e.g., prior authorization, minimum percentage of reduction for nitrates concentrations etc.)?		

Please complete and email to unep-nitrogenworkinggroup@un.org Thank you!

	Relevant policy provision /scientific/ technological interventions	Yes/No	Details (If, yes, please provide details)
National policy provisions on prevention and reduction of nitrogen waste			
8.	Does the country have any <u>awareness campaign on the prevention and reduction of nitrogen waste?</u> (e.g., for the efficient use of fertilizers, reducing ammonia emissions from farms, connecting households to sewage systems etc.)?		
9.	Does the country have <u>training campaigns for farmers on sustainable use of fertilizers?</u>		
10.	Does the country have programmes <u>for public investments on reducing nitrogen losses</u> (e.g., financially supporting farmers to invest in efficient fertilizers management facilities, machinery and equipment, governmental programmes for the extension of sewage systems and building waste water treatment plants etc.)?		

Please complete and email to unep-nitrogenworkinggroup@un.org Thank you!

	Relevant policy provision /scientific/ technological interventions	Yes/No	Details (If, yes, please provide details)
National policy provisions on prevention and reduction of nitrogen waste			
11.	Does the country have any new scientific/ technological advancements on reducing nitrogen losses (e.g., for the efficient use of fertilizers, waste to wealth, reducing ammonia emissions from farms, reducing coastal nutrient enrichment etc.)?		
12.	Are there actions taken at the subnational level (e.g. states; provinces; municipal; territories)? Please identify / list these, if available.		
13.	What types of stakeholders (e.g. farmers; fertilizer producers and associations, etc.) work or have contributed to the preparation of legislative actions, action plans, inventories, guides and/or good practice manuals? If possible, please identify / list type of stakeholders specify their specific role.
