No.	Indicators
1	(a) Hazardous waste generated per capita; and (b) proportion of hazardous waste treated, by type of treatment
2	Changes in levels of the listed persistent organic pollutants in humans
3	Countries with controls for lead in paint
4	Mortality rate attributed to unintentional poisoning (i.e. pollution and chemicals)

5	National recycling rate, tons of material recycled (i.e. reduce waste)
6	Number of countries implementing the GHS
7	Number of countries ratifying Aarhus Convention or the Escazu Agreement
8	Number of countries that have achieved core capacities for chemicals under the International Health Regulations
9	Number of countries using the Toolbox and its content to draft and adopt policies for the sound management of chemicals.

10	Number of countries with a PRTR (implement international standards for PRTRs, including parties to the Kyiv Protocol on PRTRs, countries that implement OECD standards for PRTRs, or equivalent.)
11	Number of countries with legislation in place to manage industrial and consumer chemicals
12	Number of countries with poisons centres
13	Number of member States with national Occupational Safety and Health (OSH) profiles
14	Number of parties to the Basel Convention that have developed and implemented national strategies, plans or programmes for hazardous waste minimization

15	Number of parties to the Basel Convention that have developed and implemented national strategies, plans or programmes for reducing the generation and hazard potential of hazardous and other wastes
16	Number of programmes, projects or activities carried out by parties to the Basel Convention, jointly with other parties or together with other stakeholders (regional and international organizations, conventions, industry bodies, etc.), aimed at the environmentally sound management of priority waste streams that have been monitored and assessed to achieve this goal
17	Number of ratifications of up-to-date ILO Conventions related to chemical risks
18	Parties to the Basel Convention have reached an adequate level of administrative and technical capacity (in the form of Customs, police, environmental enforcement and port authorities, among others) to prevent and combat illegal traffic and judicial capacity to deal with cases of illegal traffic
19	Proportion of agricultural area under productive and sustainable agriculture

20	Proportion of domestic and industrial wastewater flows safely treated
21	The number of Parties (Stockholm) with regulatory and assessment schemes for new pesticides and/or new industrial chemicals
22	Total amount of funding for developing countries to promote the development, transfer, dissemination and diffusion of environmentally sound technologies
