

Wstream 1 indicators

Targets	Indicators	Majority view from w/stream, 1
<i>A1 - By 2030, Governments have adopted and are implementing and enforcing legal frameworks, and have established appropriate institutional capacity to prevent or, where prevention is not feasible, minimize adverse effects from chemicals and waste as appropriate for their national circumstances.</i>	(a) Hazardous waste generated per capita; and (b) proportion of hazardous waste treated, by type of treatment	Partially addressed
<i>A1 - By 2030, Governments have adopted and are implementing and enforcing legal frameworks, and have established appropriate institutional capacity to prevent or, where prevention is not feasible, minimize adverse effects from chemicals and waste as appropriate for their national circumstances.</i>	Number of countries with a PRTR (implement international standards for PRTRs, including parties to the Kyiv Protocol on PRTRs, countries that implement OECD standards for PRTRs, or equivalent.)	
<i>A1 - By 2030, Governments have adopted and are implementing and enforcing legal frameworks, and have established appropriate institutional capacity to prevent or, where prevention is not feasible, minimize adverse effects from chemicals and waste as appropriate for their national circumstances.</i>	Countries with controls for lead in paint	
<i>A1 - By 2030, Governments have adopted and are implementing and enforcing legal frameworks, and have established appropriate institutional capacity to prevent or, where prevention is not feasible, minimize adverse effects from chemicals and waste as appropriate for their national circumstances.</i>	Number of countries that have achieved core capacities for chemicals under the International Health Regulations	

Wstream 1 indicators

<i>A1 - By 2030, Governments have adopted and are implementing and enforcing legal frameworks, and have established appropriate institutional capacity to prevent or, where prevention is not feasible, minimize adverse effects from chemicals and waste as appropriate for their national circumstances.</i>	Number of countries implementing the GHS	Partially addressed
<i>A1 - By 2030, Governments have adopted and are implementing and enforcing legal frameworks, and have established appropriate institutional capacity to prevent or, where prevention is not feasible, minimize adverse effects from chemicals and waste as appropriate for their national circumstances.</i>	Number of countries with legislation in place to manage industrial and consumer chemicals	
<i>A1 - By 2030, Governments have adopted and are implementing and enforcing legal frameworks, and have established appropriate institutional capacity to prevent or, where prevention is not feasible, minimize adverse effects from chemicals and waste as appropriate for their national circumstances.</i>	The number of Parties (Stockholm) with regulatory and assessment schemes for new pesticides and/or new industrial chemicals	
<i>A2 – By 2030, intergovernmental stakeholders develop guidelines to support the needs of interested Governments and relevant stakeholders to implement effective chemicals and waste management strategies, building on, among other things, updates of the Inter-Organization Programme for the Sound Management of Chemicals toolbox for decision-making in chemicals management.</i>	Number of countries using the Toolbox and its content to draft and adopt policies for the sound management of chemicals.	Partially addressed
<i>A3 - By 2030, companies implement measures identified to prevent or, where prevention is not feasible, minimize adverse effects from chemicals throughout their life cycle.</i>	None found	

Wstream 1 indicators

A4 - By 2030, stakeholders have effectively prevented all illegal trade and traffic of chemicals and waste.	Parties to the Basel Convention have reached an adequate level of administrative and technical capacity (in the form of Customs, police, environmental enforcement and port authorities, among others) to prevent and combat illegal traffic and judicial capacity to deal with cases of illegal traffic	Partially addressed
A5 - By 2030, Governments work towards notifying, regulating or prohibiting the export of chemicals they have prohibited nationally, in line with their international obligations.	None found	
A6 - By 2030, all countries have access to poison centers equipped with essential capabilities to prevent and respond to poisonings, as well as access to training in chemical risk prevention and clinical toxicology.	Number of countries with poisons centres	Partially addressed
A7 - By 2035, stakeholders have taken effective measures to phase out highly hazardous pesticides in agriculture where the risks have not been managed and where safer and affordable alternatives are available, and to promote transition to and make available those alternatives.	The number of Parties (Stockholm) with regulatory and assessment schemes for new pesticides and/or new industrial chemicals	Partially addressed
A7 - By 2035, stakeholders have taken effective measures to phase out highly hazardous pesticides in agriculture where the risks have not been managed and where safer and affordable alternatives are available, and to promote transition to and make available those alternatives.	Proportion of agricultural area under productive and sustainable agriculture	
B1 - By 2035, comprehensive data and information on the properties of chemicals are generated and made available and accessible.	None found	

Wstream 1 indicators

<i>B2 - By 2030, stakeholders make available, to the extent possible, reliable information on chemicals in materials and products throughout the value chain.</i>	None found	
<i>B3 - By 2035, stakeholders generate data on the production of chemicals, including the use of chemicals in materials and products, in addition to data on emissions and releases of chemicals and waste to the environment, making these data available and publicly accessible.</i>	Number of countries with a PRTR (implement international standards for PRTRs, including parties to the Kyiv Protocol on PRTRs, countries that implement OECD standards for PRTRs, or equivalent.)	Partially addressed
<i>B3 - By 2035, stakeholders generate data on the production of chemicals, including the use of chemicals in materials and products, in addition to data on emissions and releases of chemicals and waste to the environment, making these data available and publicly accessible.</i>	Number of countries ratifying Aarhus Convention or the Escazu Agreement	
<i>B3 - By 2035, stakeholders generate data on the production of chemicals, including the use of chemicals in materials and products, in addition to data on emissions and releases of chemicals and waste to the environment, making these data available and publicly accessible.</i>	(a) Hazardous waste generated per capita; and (b) proportion of hazardous waste treated, by type of treatment	
<i>B4 – By 2035, stakeholders apply appropriate guidelines, best available practices and standardized tools for hazard and risk assessment and chemical and waste management.</i>	Number of countries with a PRTR (implement international standards for PRTRs, including parties to the Kyiv Protocol on PRTRs, countries that implement OECD standards for PRTRs, or equivalent.)	Partially addressed
<i>B4 – By 2035, stakeholders apply appropriate guidelines, best available practices and standardized tools for hazard and risk assessment and chemical and waste management.</i>	Number of countries that have achieved core capacities for chemicals under the International Health Regulations	

Wstream 1 indicators

<i>B4 – By 2035, stakeholders apply appropriate guidelines, best available practices and standardized tools for hazard and risk assessment and chemical and waste management.</i>	Number of countries implementing the GHS	Partially addressed
<i>B4 – By 2035, stakeholders apply appropriate guidelines, best available practices and standardized tools for hazard and risk assessment and chemical and waste management.</i>	Number of countries using the Toolbox and its content to draft and adopt policies for the sound management of chemicals.	
<i>B5 – By 2030, educational, training and public awareness programmes on chemical safety, sustainability, safer alternatives and the benefits of reducing chemicals and waste risks have been developed and implemented, taking into consideration a gender-responsive approach.</i>	None found	
<i>B6 – By 2030, all Governments have implemented the Globally Harmonized System of Classification and Labelling of Chemicals (GHS) in all relevant sectors as appropriate for their national circumstances.</i>	Number of countries implementing the GHS	Fully addressed
<i>B7 – By 2030, stakeholders generate, to the extent possible, and make available comprehensive and accessible monitoring and surveillance data and information on concentrations and potential exposure sources of chemicals in humans (disaggregated by sex, age, region, other demographic factors, and other relevant health determinants as feasible), other biota and environmental media.</i>	Changes in levels of the listed persistent organic pollutants in humans	Partially addressed

Wstream 1 indicators

<i>B7 – By 2030, stakeholders generate, to the extent possible, and make available comprehensive and accessible monitoring and surveillance data and information on concentrations and potential exposure sources of chemicals in humans (disaggregated by sex, age, region, other demographic factors, and other relevant health determinants as feasible), other biota and environmental media.</i>	Mortality rate attributed to unintentional poisoning (i.e. pollution and chemicals)	Partially addressed
<i>D1 - By 2030, companies consistently invest in and achieve innovations towards advancing sustainable chemistry and resource efficiency throughout the life cycle of chemicals.</i>	None found	
<i>D2 - By 2035, Governments implement policies that encourage production using safer alternatives and sustainable approaches throughout the life cycle, including best available techniques, green procurement and circular economy approaches.</i>	Proportion of domestic and industrial wastewater flows safely treated	Partially addressed
<i>D2 - By 2035, Governments implement policies that encourage production using safer alternatives and sustainable approaches throughout the life cycle, including best available techniques, green procurement and circular economy approaches.</i>	(a) Hazardous waste generated per capita; and (b) proportion of hazardous waste treated, by type of treatment	
<i>D2 - By 2035, Governments implement policies that encourage production using safer alternatives and sustainable approaches throughout the life cycle, including best available techniques, green procurement and circular economy approaches.</i>	National recycling rate, tons of material recycled (i.e. reduce waste)	
<i>D3 – By 2030, the private sector, including the finance sector, incorporates strategies and policies to implement the sound management of chemicals and waste in its finance approaches and business models and applies internationally recognized or equivalent reporting standards.</i>	None found	

Wstream 1 indicators

<i>D4 – By 2030, relevant stakeholders give priority to sustainable solutions and safer alternatives to harmful substances in products and mixtures, including in consumer products, in their research and innovation programmes.</i>	None found	
<i>D5 - By 2030, Governments implement policies and programmes to increase support to safer and more sustainable agricultural practices, including agroecology, integrated pest management and the use of non-chemical alternatives, as appropriate.</i>	Proportion of agricultural area under productive and sustainable agriculture	Partially addressed
<i>D6 – By 2030, sustainable chemical and waste management strategies have been developed and implemented for major economic and industry sectors that identify priority chemicals of concern and standards and measures, such as the chemical footprint approach, to reduce their impact and, where feasible, their input along the value chain.</i>	None found	
<i>D7 – By 2030, stakeholders implement measures and strive to ensure effective occupational health and safety practices as well as environmental protection measures in all relevant sectors and throughout the supply chain.</i>	Number of member States with national Occupational Safety and Health (OSH) profiles	Partially addressed
<i>D7 – By 2030, stakeholders implement measures and strive to ensure effective occupational health and safety practices as well as environmental protection measures in all relevant sectors and throughout the supply chain.</i>	Number of ratifications of up-to-date ILO Conventions related to chemical risks	
<i>E1 – By 2035, Governments have mainstreamed the sound management of chemicals and waste through implementation in all relevant sectoral plans, budgets and development plans and development assistance policies and programmes.</i>	Number of ratifications of up-to-date ILO Conventions related to chemical risks	Partially addressed

Wstream 1 indicators

<i>E1 – By 2035, Governments have mainstreamed the sound management of chemicals and waste through implementation in all relevant sectoral plans, budgets and development plans and development assistance policies and programmes.</i>	Number of parties to the Basel Convention that have developed and implemented national strategies, plans or programmes for reducing the generation and hazard potential of hazardous and other wastes	Partially addressed
<i>E1 – By 2035, Governments have mainstreamed the sound management of chemicals and waste through implementation in all relevant sectoral plans, budgets and development plans and development assistance policies and programmes.</i>	Number of parties to the Basel Convention that have developed and implemented national strategies, plans or programmes for hazardous waste minimization	
<i>E2 – By 2030, partnerships and networks among sectors and stakeholders are strengthened to achieve the sound management of chemicals and waste.</i>	Number of programmes, projects or activities carried out by parties to the Basel Convention, jointly with other parties or together with other stakeholders (regional and international organizations, conventions, industry bodies, etc.) aimed at the environmentally sound	Partially addressed
<i>E2 – By 2030, partnerships and networks among sectors and stakeholders are strengthened to achieve the sound management of chemicals and waste.</i>	Number of countries with a PRTR (implement international standards for PRTRs, including parties to the Kyiv Protocol on PRTRs, countries that implement OECD standards for PRTRs, or equivalent.)	
<i>E3 – Adequate, predictable and sustainable financial resources from all sources needed to support achieving the sound management of chemicals and waste are identified and mobilized in alignment with the vision, strategic objectives and targets of the Framework in all sectors by and for all stakeholders, including by leveraging private finance and promoting innovative and blended-finance schemes.</i>	Total amount of funding for developing countries to promote the development, transfer, dissemination and diffusion of environmentally sound technologies	Partially addressed
<i>E4 – Funding gaps for the implementation of sound management of chemicals and waste are identified and considered for capacity-building, including through the Global Framework on Chemicals Fund.</i>	None found	

Wstream 1 indicators

<i>E5 – By 2030, Governments have taken measures to put in place policies to internalize the costs of the sound management of chemicals and waste through different approaches.</i>	None found	
<i>E6 - By 2030, stakeholders identify and strengthen, as appropriate, synergies and linkages between chemicals and waste management and other key environmental, health and labour policies, such as those related to climate change solutions, biodiversity conservation, human rights protection, universal health coverage or primary health care.</i>	Number of countries that have achieved core capacities for chemicals under the International Health Regulations	Partially addressed
