CONTRIBUTIONS AT REGIONAL LEVEL (in % of total funds requested)

NUMBER OF COUNTRIES BY REGION (by status of their contribution)

full share*** contributions
 other contributions
 unfunded

* Amounts based on pledges, to be confirmed at the time of payment including possible effect of exchange rate fluctuation

** Based on percentage increase from previous year's contribution

*** full share as per the Environment Fund Voluntary Indicative Scale of Contributions (VISC)

USA does not participate in VISC and is not a member of any regional group. However, since USA attends Western Europe & Other Group meetings as an observer, their contributions are reported as part of the WEOG summary.

NDCs cooling guide: Guidance for integrating the cooling sector into NDCs

The NDCs cooling guidelines help governments integrate sustainable cooling into their climate plans. Cooling is currently responsible for 7% of global emissions which is projected to double by 2050 while more than a billion people still lack access to essential cooling for health and food security. Supported by the Environment Fund, the Guidelines offer solutions across energy efficiency, refrigerant phase-down, and nature-based approaches. They also promote equity, robust monitoring, and cross-sector coordination to align cooling with climate goals.
