From Data to Impact: Measuring Progress through Disaggregated SDG Indicators

From Data to Impact: Measuring Progress through Disaggregated SDG Indicators (4th edition of UNEP's Measuring Progress series) highlights how detailed, disaggregated data can strengthen environmental decision-making and accelerate progress on the Sustainable Development Goals. The report, made possible by the Environment Fund introduces new approaches to disaggregating 92 environment-related indicators—supporting more targeted, evidence-based action at national and local levels, and helping governments design interventions that deliver tangible benefits for people, the planet, and the economy.

* Amounts based on pledges, to be confirmed at the time of payment including possible effect of exchange rate fluctuation

** Based on percentage increase from previous year's contribution

*** full share as per the Environment Fund Voluntary Indicative Scale of Contributions (VISC)

USA does not participate in VISC and is not a member of any regional group.
